

HEAT AND HUMIDEX POLICY

When the temperature, at any point in the day of play, is registered as being above 30 degrees Celsius as recorded on Environment Canada's website http://www.weatheroffice.gc.ca/city/pages/on-118_metric_e.html, the Dragons heat policy will come into effect.

Heat Policy

When temperature reaches above 30 degrees Celsius, there will automatically be two water breaks per half. Games and practices will continue as scheduled. Coaches are to monitor players for signs of heat stress or injury.

The Dragon's Board reserves the right to cancel soccer activities based on extenuating circumstances and/or explicit weather warnings as posted on Environment Canada's web site.

Air Quality Policy

If the air quality rating is forecast on the Environment Canada web site at 7 or above at game/practice time, soccer activities will be cancelled. The forecast review will be conducted by the Dragons Executive and coaches will be notified by the office and via the web site of any cancellation.
